

Bunch of Bubbles
Good Clean Fun for Everyone!

Benefits of having Bunch of Bubbles at your next event:

Our Outdoor Bubble Program is a joyful, hands-on experience that brings learning and movement together through the magic of bubbles. Students get to experiment with a variety of bubble wands while they run, chase, pop, and play!

- Encourages movement and whole-body play
- Builds hand-eye coordination in a natural, playful way
- Helps students explore cause and effect through hands-on experimentation
- Offers rich sensory experiences that support focus and engagement
- Fosters cooperation, turn-taking, and positive social interaction
- Welcomes students of all abilities, with flexible ways to participate

Our outdoor bubble program is designed to be inclusive, flexible, and accessible for all students, from pre-K through high school and across a wide range of abilities. Activities are self-paced and allow students to engage at a level appropriate to their comfort, ability, and interest.

Programs may be offered as:

- Grade level rotations
- Field Day or Enrichment activities
- School-wide outdoor programming like back-to-school bashes

What we bring to the party!

We bring a wide variety of bubble tools invite curiosity. Kids experiment, observe cause and effect relationships, and discover what happens when they move, change tools, or work together. Kids and grownups alike are amazed by the fantastic bubbles they can create, and they make for an incredibly memorable experience!

Multiple options mean everyone can participate in a way that feels right for them, regardless of age or ability. Some tools reward big movements, others invite focus and fine motor play—there's always something engaging to explore.

Our diverse setup also allows us to adapt to changing conditions, from wind and heat to light rain or indoor spaces, so the experience stays fun and flexible no matter the day.

Each tool is designed by the team at Bunch of Bubbles and draws on our years of expertise for an experience you can't get anywhere else!

Big Dippers make basketball-sized bubbles on calm or breezy days. Great for all ages!

Tri-string wands- great for teens, and older kids. They make HUMONGOUS bubbles in calm winds.

Little Dippers make smaller bubbles, and long tubes. Great for toddlers, and for doing bubble tricks!

Shooting Stars make clusters of bubbles in stronger winds, and are great for all ages!

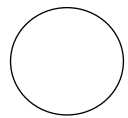

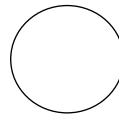

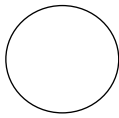

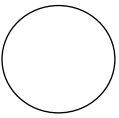

Galaxy Garlands produce tons of bubbles in high winds. They're great for parents, older kids, or team bubbling!

Bunch of Bubbles Entertaining Setup

Bubble Trailer

11 feet wide
6.5 feet deep

Bubble stations

We place each station about 6 feet apart, and plan on one station for every 3-5 kids. We add more stations as needed.

Site needs:

A safe place for kids to play. It can be any surface other than gravel or dirt. A grassy field, basketball or tennis court, or unused parking area are all fantastic. We can work in smaller spaces, but room to run is much more fun! We use 36-inch kiddie pools to protect your surfaces, and to help minimize messes.

Access to tap water. We mix bubble solution on-site so we can keep the party going! We use a 20-gallon tub that we transport with a rolling cart, or 5-gallon buckets, and do carry a food-grade hose with us.

Things to know:

We can't control where bubbles fly. On a windy day we can launch hundreds of bubbles at one time that can fly 50 yards or more. On calmer days we can make bubbles as big as 30-40 feet long.

We're not kidding when we say "Bunch of Bubbles"- we can go through over 100 gallons of bubble solution at some events. It's an insane amount of bubbles.

We make every attempt to leave every space as good as we found it. We thoroughly wipe up any spills, and rinse any paved surfaces if necessary.

We like to be good neighbors to other event participants. Please don't put us near any activity that could be damaged by flying bubbles or near food.

The bubble solution is our own recipe that uses Dawn dish soap, guar gum, and a special cosmetic-grade polymer. It's about 95% water, and safe for kids and pets.

The safety of the kids is very important. We stop all activities if conditions become unsafe- thunder storms, heavy rain or high winds for example.

Bunch of Bubbles is fully insured, and we can add specific riders for your event if necessary.

Our trailer.

It's a converted pop-up camper, and about the same size as a 10x10 easy-up

A typical setup

Additional information:

Bunch of Bubbles reserves the right to discontinue services if conditions become unsafe.

For example:

- Thunder and lightening, excessive wind, temperatures over 90 degrees or below 50 degrees, or other inclement weather. We actually like a little rain- it makes better bubbles. We can make bubbles outside at any temperature over 35 degrees. If it's under 50 degrees we will need breaks to warm up a little between groups. We tend to keep an eye on the weather before an event, and can pivot to indoor bubbles if the weather isn't cooperating.
- Children are acting in ways that could cause injury to themselves, or other students, or damage to our equipment.
We keep an eye on the kids, but do ask for help in managing any challenging behaviors
- Darkness if there isn't suitable lighting, or poor visibility. We start packing up about an hour before sundown if there isn't enough light for people to move around safely. Night bubbles are beautiful, and a lot of fun if you do have an evening event, and can provide a decently-lit space.

Safety is our top priority, and we appreciate your help with maintaining a safe environment. We are very invested in making your event a success, and will make every effort to work our contracted hours. We want everyone to have a fun, safe time!

- We will arrive to setup approximately 1 hour before your event begins. For outdoor bubbles we ideally need to be able to drive-in, and park our trailer in the spot that you have assigned to us. In general it takes us 30-45 minutes to clean up after the event as well. We're fully self-sufficient, and don't need anything beyond water once we arrive.

The trailer serves as our headquarters for the day, and lets us carry a variety of equipment for different ages and abilities. We don't necessarily need to bring it, but it really helps us be ready for anything.

- Bubbles themselves are 95% water, and thinner than wavelengths of light. We can, and will make bunches of bubbles in just about any kind of weather, but the actual size of them will depend on the weather, and the amount of wind on the day of your event. On windy days we create tons of small bubbles, and on calmer days we make GIANT bubbles. We judge the atmospheric conditions, and make the best bubbles that we can make at every event.

What happens if it rains?

We can either reschedule for a rain date, or we can pivot to indoor bubbles. We have a great indoor setup so kids can still have a blast! All we would need is a room with enough table space to accommodate a group of kids. Our extensive equipment inventory, and years of expertise ensures that everyone can have a great time rain or shine

In the days leading up to the event we'll be checking the weather, and reaching out to develop a plan with you if the weather looks iffy.

Pricing

Standard package outdoor bubbles:

- 4-5 bubble stations for 20-30 kids at one time.
- Two staff members. One person makes sure the bubble stations are stocked with solution, and tidy while the other works with the kids. We are humans, and need to sit, eat, use the restroom or warm up or cool-off on occasion, but we always aim to put on the best show possible.
- If your event has parent or teacher volunteers we always appreciate an extra grown-up or two to help keep an eye on things.

\$250 for the first hour, and \$150 each additional hour for any location within 30 minutes of 14847. Our coverage area includes all of the Fingerlakes, Central, and Western New York, but additional travel charges will apply.

This works well for field days, back to school events, summer recreation programs, and other special celebrations.

We can add more bubble stations and staff depending on the size of your crowd

Indoor Bubbles for STEM, Social Emotional Programs, and Sensory Bubble events:

We can work with any age, or developmental stage to create a memorable experience for your participants!

Past projects have included making giant bubble wands with middle school/high school kids, make and take projects, early literacy fun, and exploring science concepts using bubbles.

All-New Slime Time!

Our Jiggly Slime formula is exclusive to Bunch of Bubbles. It's 100% natural, easily dissolves in water, won't stain, stick to hair, or fabric, and is approximately 99% water. We use all-natural shimmery mica powders to color the slime, and each child gets their own container of slime to bring home!

Slime takes approximately 15-30 minutes per session to complete, and recommended for 2nd grade, and up. Bubbles are more "open ended" and can flex to fit your schedule for the day.

Facilitator-

Karen Stark is a cosmetic chemist with an additional degree in psychology. She has years of experience working with kids across different settings including several years as a circus camp counselor. Reach out to Karen to discuss how we can bring unique programming to your organization! We're happy to discuss how we can bring unique programming to your organization! We're happy to work with your curriculum, learning goals, theme, and budget.

Payment-

We accept Paypal, Venmo, credit cards, or checks. Please let us know if you need us to do any procurement paperwork, or provide a W-9. Make checks payable to Karen Stark 3764 County Rd 141 Interlaken, NY 14847

We are fully insured, and can add your organization as additionally insured for any event.

Please call Karen Stark at 607-391-2757 or email karen@bunchofbubbles.com with any questions, or to discuss your event!

Bubble Program — Administrator Summary

Program Name: Outdoor Bubble Program

Provider: Bunch of Bubbles

Owner/Lead Facilitator: Karen Stark

Service Area: Within 2 hours of Trumansburg or Ovid, NY

Program Overview

The Bubble Program is a facilitated, hands-on enrichment activity designed for school settings. Students engage with professional bubble tools in a structured, supervised environment. The program is inclusive, adaptable, and appropriate for **all ages and abilities**, from pre-K through high school.

Programs may be conducted **outdoors or indoors** depending on weather and facility availability. Outdoors is preferable. All equipment, materials, setup, facilitation, and cleanup are provided by the program staff.

Educational & Developmental Benefits

The program supports:

- Gross motor development
- Hand-eye coordination
- Cause-and-effect learning
- Sensory engagement
- Cooperative play and social interaction
- Inclusive participation across ability levels

Activities scale in complexity to match age and developmental needs.

Format & Scheduling

Programs may be offered as:

- Grade-level rotations
- Field days or enrichment events
- School-wide activity stations
- Inclusive programming for special education students

Participation is self-paced and non-competitive.

Indoor & Outdoor Use

- **Outdoor:** Fields, blacktop, tennis or basketball courts. No dirt or gravel.
- **Indoor:** Gyms, cafeterias, multipurpose rooms, large classrooms

For indoor programs, floor protection and controlled-use equipment are utilized. A moppable floor is recommended.

Safety & Risk Management

- Bubble solution is **non-toxic** and not intended for consumption. It is made with Dawn detergent, water, and cosmetic grade polymers
- Activities are supervised by trained staff
- Clear participation guidelines are provided
- Hand washing or sanitizing is recommended afterward
- Staff coordinate supervision with school personnel

Accessibility & Inclusion

- Adaptable for students with physical, sensory, or developmental differences
 - Participation may be seated or standing
 - Non-verbal participation is supported
 - Accommodations coordinated with school staff
-

Facility Impact

- Minimal impact on school facilities
 - All setup and cleanup handled by provider
 - Spaces left in original condition
-

Presenter Qualifications

Karen Stark is a professional bubble artist, cosmetic chemist, and product designer with over 20 years of experience. She has provided interactive bubble programs in educational and public settings for over 8 years and is the owner of **Bunch of Bubbles**.

Insurance & Professional Standards

- Fully insured (certificate available upon request)
 - Experienced with district approval processes
 - Programs align with standard school safety expectations
-
